

## Dear Visitor

The Layout of our hospital follows a colour route system.

- The whole hospital is divided in to parts **A B C D F**
- All areas display the coloured characteristic and description of that part of the building, the floor/level and also the room number.
- The exact details are found on the plan of the site which is situated in our reception area, or please speak to one of our members of staff for information.
- The Layout follows a system which becomes more precise the nearer one reaches the destination.
- At each intersection you get more detailed information about your required destination.

The following example illustrates the System:

If you get lost please ask a member of staff. We welcome your comments and suggestions.

# Finding your way in our hospital
